Site is a building with bright light, very old air.
There is a lot of equipment, measuring equipment
(gauges, dials, etc.) along the walls. The
"Room" has a medicinal smell and
contains ~~stet~~ steel canisters. People wearing
hooded, reflective visored suits with padded
"broth" type shoes work in the area. ~~Many~~
They manipulate the contents of the room
using such safe-guards as pass tubes. It is
almost like, Adv. a BW facility, or Adv
a facility ~~that~~ using volatile nerve gas
elements.
